

Account Manager

Description

As a Procurement Manager in the solar/wind industry, you will play a pivotal role in ensuring the efficient sourcing and acquisition of materials, equipment, and services necessary for the development and operation of renewable energy projects.

Responsibilities

Identify, evaluate, and select suppliers for various components and services required for solar and wind projects. Develop and implement procurement strategies aligned with project requirements, cost targets, and sustainability goals. Negotiate contracts with suppliers, including pricing, delivery terms, warranties, and service level agreements. Ensure contracts are robust, legally sound, and aligned with project objectives.

Continuously improve procurement processes and procedures to enhance efficiency, reduce lead times, and streamline workflows. Implement best practices in procurement management and leverage technology solutions where applicable.

Monitor procurement costs and expenditures, identifying opportunities for cost reduction and value optimization. Develop and execute cost-saving initiatives without compromising quality or project timelines

Identify potential risks in the supply chain and develop strategies to mitigate them. Proactively address issues related to supplier reliability, geopolitical factors, market volatility, and regulatory compliance

Sound knowledge of QAP/GA/GTP/IRN etc.
